The screenshot shows the 'Biblioscape Express' application window. The title bar reads 'Biblioscape Express - Knot, Antoni 1967'. The menu bar includes 'File', 'Edit', 'View', 'Go', 'Record', and 'Help'. Below the menu is a tabbed interface with 'List', 'Record', 'Online', and 'Welp' tabs. The 'Record' tab is active, showing a toolbar with icons for 'OK', 'Cancel', 'Print', 'Find', 'Add', 'Base', 'Delete', and navigation buttons. A status bar at the top right indicates '1452 of 1477'. Below the toolbar are tabs for 'General', 'Detail', 'Custom', 'Notes', 'Abstract', 'Document', and 'All Fields'. The 'General' tab is selected, displaying a form for a 'Journal Article'. The form fields are as follows:

Reference Type	Journal Article	Mark		1452					
Authors	Knot, Antoni								
Title	Związki Józefa Maksymiliana Ossolińskiego z nauką czeską								
Source	Roczniki Biblioteczne								
Editors									
Year	1967	Volume	11	Number		Start Page	257	End Page	311
Publisher				Place Published					
Subject				Type of Work					
Keywords									

At the bottom of the window, a status bar says 'For Help, press F1' on the left and '1477' on the right.

Writing Workhorse: The Muscle of KeyNote Remains Strong

save

BLOGGER'S NOTE: I've been holding back a post about one of my most important writing tools, which has been sitting in draft form until a lull in posts would call it forward. Now that I've recovered from an illness that wiped me out for a few days, I've called up the draft to make important additions and alterations leading to this post.

I rely on note organizers and outlining programs to help me pull information together. For my introduction to such programs, you may wish to read my post [Better Than A Shoebox](#), which explains the usefulness of these programs and the differences between single- and double-pane note organizers.

KeyNote has been around for quite awhile, but it is often overlooked, especially by new writers. It is free, open-source software, developed by Marek Jedlinski, a self-trained Polish programmer. What few people realize is that Jedlinski's professional training is in translation and American Literature. He's a writer! No wonder that the program seems so responsive in the hands of another writer. Moreover, Jedlinski has been a teacher of American literature in the Department of American Literature and Culture at the University of Lodz. He also works as a free-lance translator, with a specialization in translation and testing of localized versions of major software, including Corel WordPerfect, Microsoft Office and Microsoft Encarta Interactive English Learning. He also translates novels, short stories, film scripts and other materials into Polish and serves as translator to several Polish literary magazines.

While Jedlinski spent years developing KeyNote, he stopped working on it in 2003. It has not been upgraded since. Many in the computer world have consequently forgotten about or turned away from KeyNote. For me, the program remains so powerful and so useful that I still call it my "workhorse." There's not a day that I don't use it.

Fortunately, Jedlinski has not taken down [his software website](#), though it too hasn't been updated for several years. For more information, read the [KeyNote homepage](#) and be sure to click the Features and Screenshots links along the top, which will illustrate more functions within the program. These comments refer to the last update version 1.6.5. Disregard the comments about a forthcoming version 2.0.

Free sex? Try FOSS instead

By [Susan Cragin](#) / [For the Monitor](#)

March 20, 2010

Everyone wants something for nothing, but usually there are strings attached. Over the internet this is especially true, because there is so much something, and the strings are hard to see.

Take sex. Most people who surf for pornography think they're getting something for nothing. They ignore the attached strings. The viruses, the bots, the credit card scams, the ads for dubious and fraudulent services. Not to mention the police stings, the humiliation and occasional jail time.

One of the best FOSS programs is a simple little tabbed notebook and editor called KeyNote. It was written years ago by Marek Jedlinski, a Polish teacher of American literature, to organize his writing, his lecture notes, and his thoughts. He wrote it, released it as free, and then sort of forgot about it. Since then, it has made him famous among writers, researchers, and anyone who keeps a diary. It is available on Sourceforge, where about 400 people still download it every week.
